65 / 100 User Experience

Should Fix:

Configure the viewport

Your page does not have a viewport specified. This causes mobile devices to render your page as it would appear on a desktop browser, scaling it down to fit on a mobile screen. Configure a viewport to allow your page to render properly on all devices.

[Configure a viewport](#) for this page.

Use legible font sizes

The following text on your page renders in a way that may be difficult for some of your visitors to read. [Use legible font sizes](#) to provide a better user experience.

The following text fragments have a small font size. Increase the font size to make them more legible.

- Ads by Google renders only 4 pixels tall (12 CSS pixels) final.
- ► Lady from Ukraine and 3 others render only 4 pixels tall (13 CSS pixels) final.
- Marriage for Green Card and 6 others render only 3 pixels tall (10 CSS pixels) final.
- Copyright©2013...via- Yaroslava and 1 others render only 3 pixels tall (10 CSS pixels) final.

Consider Fixing:

Size tap targets appropriately

Mobile

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `` and 9 others are close to other tap targets final.
- The tap target `<div class="ad_image_container"></div>` is close to 1 other tap targets final.
- The tap target `` and 1 others are close to other tap targets final.
- The tap target `Hot or Not` and 4 others are close to other tap targets final.
