Should Fix:

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 4 blocking script resources and 5 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

[Remove render-blocking JavaScript:](#)

 Should Fix:

Size content to viewport

The page content is too wide for the viewport, forcing the user to scroll horizontally. [Size the page content to the viewport](#) to provide a better user experience.

Mobile

The page content is 915 CSS pixels wide, but the viewport is only 375 CSS pixels wide. The following elements fall outside the viewport:

- The element `` falls outside the viewport.
- The element `SoundCloud Plays` falls outside the viewport.
- The element `SoundCloud Downloads` falls outside the viewport.
- The element `Pinterest Followers` falls outside the viewport.

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `<div class="owl-pagination"></div>` and 1 others are close to other tap targets final.
- The tap target `About Us` and 14 others are close to other tap targets.
